

CTF: Hackday Finals 2025
Challenge: Edgar the psychologist
Category: OSINT
Team: La Menace

First of all, we notice **3 main things**:

- Car license plate is small
- A building at the left side and a red square logo with “TS”
- “P” Road sign (Parking)

1. Focus on the “Parking” sign

We are searching for an European-type of sign, with a particular symbol squared.

French ones are like this so we can forget about France :

Let's check out other countries near to France, about Germany and yes we have it now:

2. Check out the License plate :

3. Focus on the red square Logo

I actually read “BTS” so let’s check for switzerland company using “BTS” as name.

Can’t find anything using BTS or only “TS Company switzerland” “Red Logo companies in Switzerland”, ...

Let’s check out the reverse search on the logo even if it’s hidden by trees.

Using only “Switzerland” we can find “RTS”:

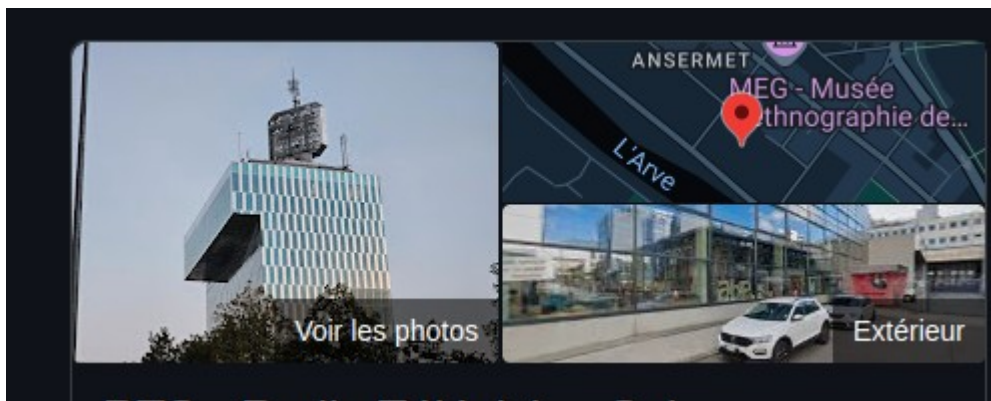

Let’s check their HeadQuarters.
They have 2 different buildings for “RTS”

[Afficher les adresses des bureaux régionaux](#)

The one in Geneva doesn’t seems like the right one:

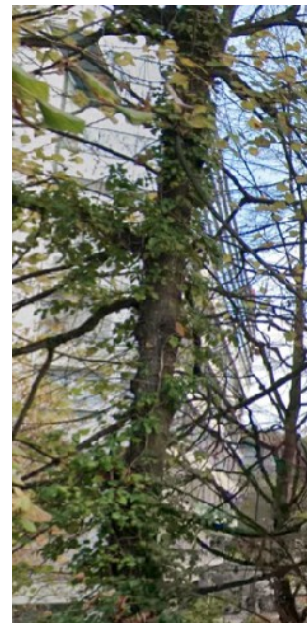

So focus on the second one, in Lausanne.

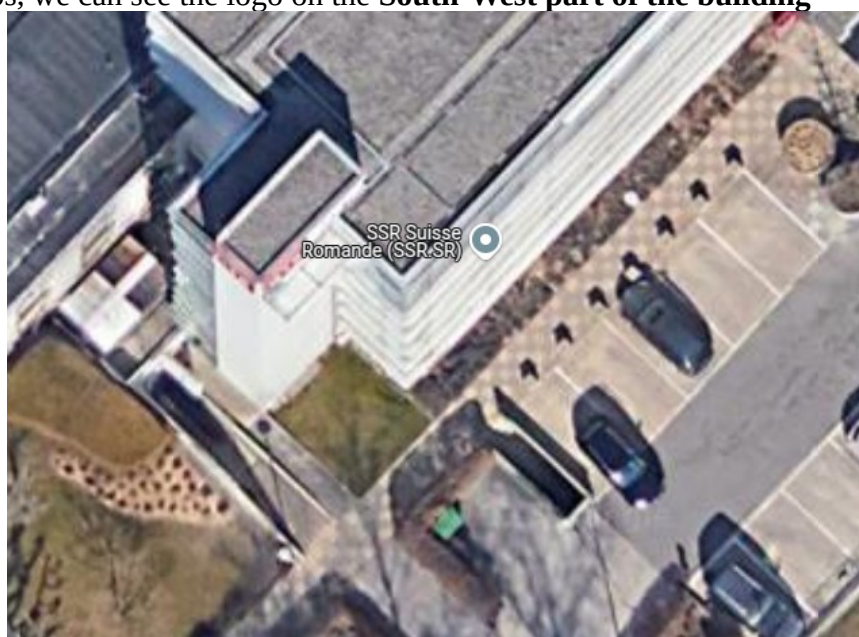

This one looks quite nice.

Same logo in the corner, and **with some windows visible** on our photo.

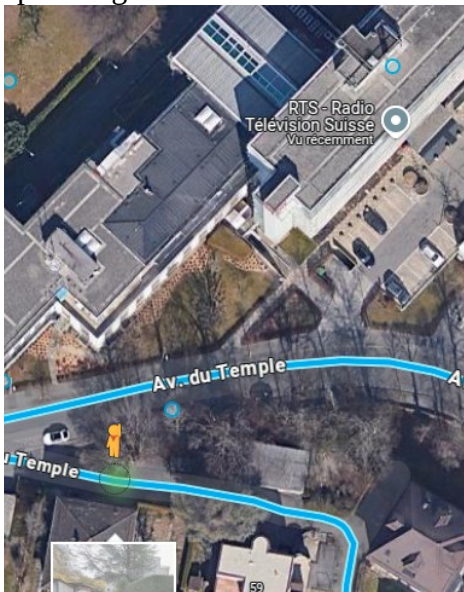

On Google Maps, we can see the logo on the **South-West part of the building**

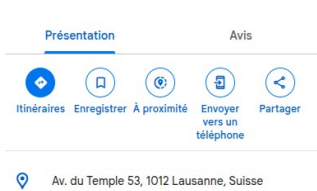

With this information, we can determine the **Point Of View of the picture**

Spawning on this little street

Well, we find it ! Just need to have the address of that house

Av. du Temple 53, 1012 Lausanne, Suisse
